

TOURING EVO

Airbag Vest

The TOURING EVO airbag vest from Rock Tool Co is the new benchmark in safety for motorcyclists. It incorporates EN 17092-6:2020 certification and Alienor Certification's AMC-013 protocol. High-level technology, functionality and materials at the service of safer riding.

Ref: JTP107BK*

Sizes: S-XXL

Features

Airbag activation	Mechanical<0,20 seconds
Protected areas	Neck, back, chest
Color	Black
Certifications	Airbag (EN 1621-4:2013) / Back protector (PPE:CE Cat. II-EN 1621-2 Nivel 2)
Protections	Back protector SAFE TECH 851
Fastenings	Adjustable straps. DURAFLEX® buckles
Extras	Inner 3D breathable mesh. Neoprene collar. Pocket for documents
Accessories included	Motorcycle lanyard. CO2 cartridge (60 cc-45 g). Tool for installing/removing the cartridge. User guide.
Weight	1.797 g.
Warranty	2 years

Innovation in safety for motorcyclists

>> The TOURING EVO has been developed based on the I-ARMOUR Concept, which guarantees intelligent, high-coverage protection that adapts to our body. It is a comprehensive protection solution designed for those seeking a higher level of safety.

>> Its approval under EN 17092-6:2020 and Alienor Certification's strict AMC-013 protocol make it one of the most comprehensive airbag vests on the market.

CAT. II

These certifications ensure **comprehensive protection** against impacts, abrasions and falls, complying with the latest **European standards** for protective equipment for motorcyclists.

Multi-zone Enveloping Protection

>> The TOURING EVO protects the areas most exposed to serious injury, mainly the **neck** and **back**, without forgetting the **rib cage** and soft organs such as the **liver and spleen**.

>> Helps prevent serious **trauma and injuries**, such as **cervical hyperflexion** or **hyperextension**, which are very common in motorcycle accidents.

Reliable and Fast Activation Technology

>> The activation system is **completely mechanical**, with no batteries or electronic components. It is connected to the motorcycle chassis by a safety strap.

>> In the event of a fall, the trigger activates the **vest's inflation in less than 0.2 seconds**.

>> A robust, **quick and easy-to-maintain system**, ideal for all types of motorcyclists.

Premium Materials for Maximum Durability

The Touring design is optimised for long road trips and everyday use. Its **open, ventilated structure** offers comfort even in warm weather, with a perfect fit over motorcycle jackets.

- Front closure with **DURAFLEX® buckles, easy to use** even when wearing gloves, allowing for a precise fit. The central opening between the buckles facilitates **front ventilation**, contributing to better air circulation in the hottest months.
- **Durable 600D outer fabric** provides **protection against abrasion** and resistance to cuts and tears.
- **3D mesh lining** for improved ventilation. Soft neoprene neckband for improved comfort. Zipped pocket for documents, cards or small accessories.

Integrated Back Protection – SAFE TECH Level 2

>> Incorporates a SAFE TECH 851 Level 2 back protector, approved (PPE: CE Cat. II – EN 1621-2 Level 2), made from ViscoFlex material.

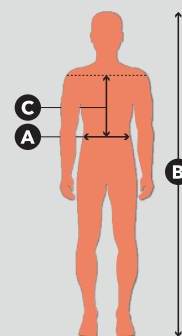

>> **Absorbs high-energy impacts** and incorporates 10 **ventilation channels** to improve breathability.

SIZE GUIDE

Talla / Size / Grösse / Taille	S	M	L	XL	2XL
A(cm)	85 - 95	90 - 100	96 - 105	102 - 110	106 - 115
B(cm)	165 - 173	171 - 179	177 - 185	183 - 191	189 - 197
C(cm)	30 - 34	32 - 36	34 - 38	36 - 40	37 - 41

Note: Choose the right size for your body, taking into account the clothing you usually wear under the vest. To select the correct size, check your height and chest circumference according to the pictogram below and choose the appropriate size from the table. Avoid choosing the wrong size, as this could reduce or negate the effectiveness of the product.

HOW DOES A ROCK TOOL CO AIRBAG VEST WORK?

The Rock Tool Co system is completely mechanical, simple and reliable.

Simply attach the vest strap to your motorcycle frame. The I-ARMOUR system is then ready for action. If the rider falls or is suddenly separated from the motorcycle, the striker activates the CO₂ cylinder, which inflates the vest in milliseconds, protecting the entire body.

HOW LONG DOES IT TAKE FOR THE AIRBAG TO ACTIVATE?

The airbag vest inflates in less than 200 milliseconds, protecting you before the impact occurs.

CAN IT BE REUSED AFTER ACTIVATION?

Yes. If the vest has not been damaged, simply replace the CO₂ cartridge with a new one and reattach it. You can see the process in the user manual or on our [website](https://www.airbagmotorocktool.com).

Official replacement parts are available at the shop where you purchased it or at www.airbagmotorocktool.com.

CAN IT BE ACTIVATED ACCIDENTALLY?

No. The Rock Tool Co mechanical system requires a minimum force of 20 kg to activate, so it will not be triggered accidentally while riding.

If you forget to unhook it when you get off your motorbike, it could activate, but without any risk to the user. Simply retract the system and replace the CO₂ cylinder.

CAN I USE IT WITH MY MOTORBIKE JACKETS?

Yes. The vest fits easily over any jacket and allows complete freedom of movement.

It also provides added protection. When inflated, it exerts controlled pressure that keeps the jacket close to the body, reducing the risk of displacement or abrasions.

IS IT SUITABLE FOR CITY AND ROAD USE?

Yes. Thanks to its ergonomic and ventilated design, the Touring EVO is designed for both long journeys and urban use.

WHAT IF I HAVE A PROBLEM WITH THE VEST?

Rock Tool Co is a Spanish company based in Eibar (Guipúzcoa).

All our products have a 2-year warranty and we have an official Technical Service for repairs and maintenance.

HOW IS THE TOURING EVO DIFFERENT FROM OTHER AIRBAG VESTS?

The TOURING EVO stands out for its dual EN 17092-6:2020 and AMC-013 (Alienor Certification) certification, offering more comprehensive protection than other vests on the market.

It is a comprehensive protection solution designed for those who seek a higher level of safety and confidence when travelling. Technology, functionality and high-quality materials at the service of safer driving, qualities that define all Rock Tool Co products and led to the brand being chosen by the [DGT](https://www.dgt.es) (Spanish Traffic Authority) for its [motorcyclist safety campaign](https://www.dgt.es).
